Education

Ganapathy Engineering College Sept 2021 - July 2024
B.Tech in Computer Science and Engineering (AI & ML)

- GPA: 7.01/10.0
- **Coursework:** Artificial Intelligence, Machine Learning, Data Structures, Algorithms.

Skills

Languages: Python, SQL, Java
Frontend & Backend: HTML, CSS, JS, TS, React, Storybook, Node js, FastAPI, MySQL, Docker, Django
GenAI: LLMs, RAG, AI Agents, Prompt Engineering, LangGraph, LangChain, Vector Databases

Experience

Associate Software Engineer (ASE) — Full-time Remote
[Zemoso Technologies](#) [🔗](#) April 2026 – Present
Dev Intern — Internship Remote
[Zemoso Technologies](#) [🔗](#) July 2025 – April 2026

Projects

AI-Powered Discovery Platform June 2026 - Present

- Designed and implemented a Human-in-the-Loop workflow for LLM-generated interview questions, including backend APIs, schema changes, and an inline review/approval interface for validating questions before live interviews.
- Built a Knowledge Base ingestion pipeline supporting multiple document formats, with LLM-driven overview generation that automatically produces workspace summaries and contextual discovery questions.
- Developed the Workspace Detail Page as a full-stack workflow covering workspace creation, document ingestion, candidate invitation gating based on question approval, and report viewing.

Root Cause Analysis Platform March 2026 - June 2026

- Built a multi-agent LangGraph pipeline with Orchestrator, Planner, Worker, and RCA agents, incorporating retry logic, confidence-gated early stopping, and SSE streaming for real-time investigations.
- Engineered a dual-agent RCA workflow where independent analysts generate confidence-scored reports, with an LLM judge arbitrating disagreements and validating supporting citations.
- Developed a plan-driven MCP integration where the Planner generates structured tool calls executed by specialized workers for Metrics, Logs, GitHub, and Knowledge Graph investigation.
